Provide Input on the Future of Barrington, NH

Residents Encouraged to Take Survey on Recreation Programs and Priorities for the Future.

September 6, 2018 – The Town of Barrington has commissioned a Recreation Master Plan Survey as part of an effort to update the existing master plan. Community input is an important part of this process and helps the town to best tailor the plan to reflect the community's desires and needs.

A random sampling of residents has been invited to take a survey, and these responses will provide statistically valid results. In addition, the city invites all residents to provide feedback and input through an open-link survey by visiting <http://www.barringtonrec.org/open>

The results of this survey will provide critical information in determining community values, satisfaction levels, needs and priorities, and demographics for the town's long-term planning efforts. Questions will be asked about what types of programs, future facilities, and services residents want in their recreation system and where priorities should be placed.

This project is led by GreenPlay, LLC, with survey and data work done by RRC Associates. A total of nearly 3,000 households in the Town of Barrington were mailed a paper survey and cover letter, and responses from these residents will comprise the statistically-valid sample. The open-link survey will give all residents an opportunity to provide feedback, and their responses will be included in the final report. While open-link results will be kept separate from the statistically valid responses, these responses will none-the-less provide valuable feedback for the Town of Barrington.
